

# MISSION NURSING AND REHABILITATION CENTER SUCCESS STORY

**Dorothy D.** was admitted to Mission Nursing and Rehab in August 2023 following a left hip fracture resulting in functional decline in the areas of mobility, transfers, and ADLs. She was evaluated our therapy team, which revealed impairments in strength, activity tolerance, dynamic standing balance, coordination, muscle recruitment, stability and endurance affecting ADLs, bed mobility, transfers and ambulation.

Our experienced therapy team created an individualized plan of care for Dorothy that focused on treating her impairments. After 15 days of skilled rehabilitation, she demonstrated significant improvement with functional mobility, bed mobility, transfers, ambulation, and activities of daily living. **With the help of our rehab team, Dorothy was able to reach her goals and successfully return home!**

## Dorothy's Therapy Outcomes

NURSING AND REHABILITATION CENTER

**1013 S. BRYAN ROAD, MISSION, TX 78572**
