

MISSION NURSING AND REHABILITATION CENTER SUCCESS STORY

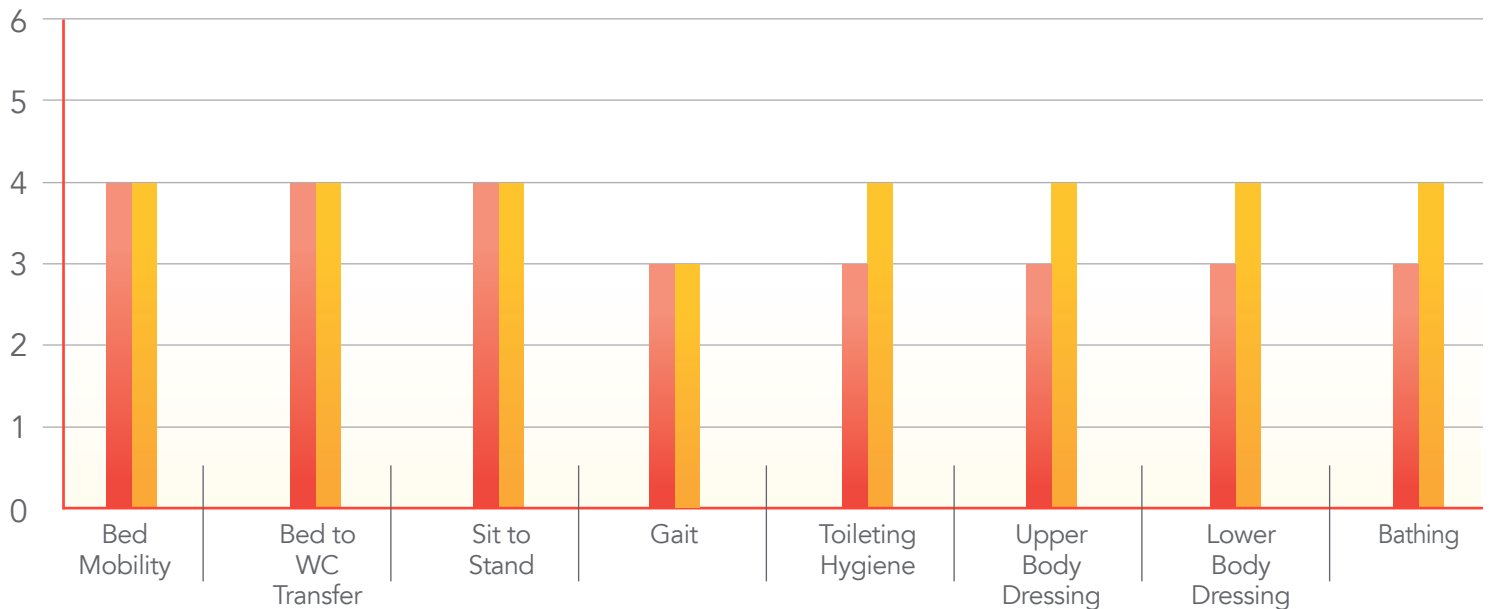

Jose P. was admitted to Mission Nursing and Rehab in October 2024 following cardiac heart failure with decline in functional mobility, transfers, ADLs, and ambulation. His initial therapy assessment indicated impairments in strength, balance, activity tolerance, and coordination impeding dressing, bathing, and toileting tasks.

Following a 20-day stay at our skilled nursing facility, Jose made significant therapy improvements by walking up to 40 feet with minimal assistance. He is also now able to bathe with supervision and dress himself independently. He successfully returned home to continue his progress with home health therapy! Congratulations Jose!
