

MISSION NURSING AND REHABILITATION CENTER SUCCESS STORY

Maria M. was admitted to Mission Nursing and Rehab in December 2024 to address safety awareness, minimize falls, increase strength and functional activity tolerance, and facilitate independence with gait/ADLs. Our therapy evaluation indicated impairments in strength, activity tolerance and balance, impeding mobility, transfers and ambulation. She required minimal assistance with toileting tasks, lower body dressing, bathing, and upper body dressing.

Following a 14-day stay, Maria made significant improvements by walking up to 200 feet independently, and could now bathe with supervision and dress herself independently. She successfully returned home to continue her progress with home health therapy! Congratulations Maria!
