

MISSION NURSING AND REHABILITATION CENTER SUCCESS STORY

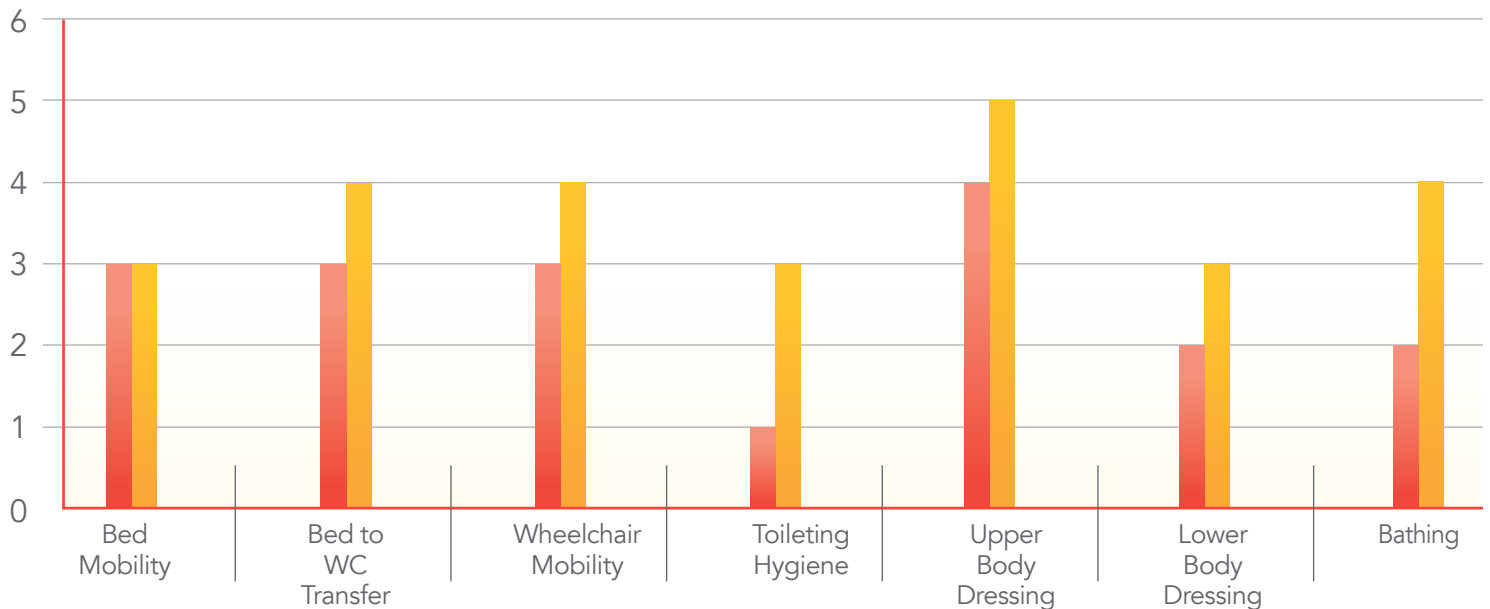

Rodolfo V. was admitted to Mission Nursing and Rehab in January 2025 for physical therapy, occupational therapy and wound care. He arrived with impairments in strength, activity tolerance, coordination and balance, affecting bed mobility, transfers, ADLs and ambulation.

After working with our experienced therapy team for just 23 days, Rodolfo made significant improvements in physical therapy by achieving his goal of walking 270 ft with a walker with contact guard assistance! He can also now bathe and dress himself with minimal to supervision assistance. Rodolfo successfully returned home to continue his progress with home health therapy. Congratulations on your rehab success!
